## Professional Summary

---

Senior web developer with 20+ years building scalable e-commerce platforms for high-volume retail. Specialises in Shopify extensibility - app and Shopify Function development - alongside bespoke API integration and AI-driven workflows that improve search, automate service, and speed up data processing. Backed by two decades of hands-on Linux engineering and AWS operations, with a track record of keeping high-traffic production systems fast and available.

## Skills

---

- **Languages:** PHP, JavaScript (full-stack), SQL, Liquid
- **Shopify:** App development, Shopify Functions, custom theme architecture
- **DevOps & Infra:** Linux engineering & ops, AWS, Git, GitHub Actions, Ansible, automated deployment pipelines
- **APIs & Backend:** Bespoke API development, GraphQL, 3PL and ERP integration
- **E-commerce:** Klaviyo, Algolia, payment gateways (Braintree 3DS2, Worldpay, Opayo)
- **AI:** AI integrations, automated content generation, predictive analytics

## Work Experience

---

### Senior Web Developer

SOZO, Cheltenham | 2007 – Present

- **Shopify extensibility:** engineered bespoke Shopify apps and custom Functions to solve complex discounting, routing, and checkout requirements for enterprise retail clients.
- **AI implementation:** built and integrated AI features into client projects, improving search relevancy, automating customer-service workflows, and streamlining data processing.
- **Scalable architecture:** built high-performance storefronts with full-stack JavaScript and bespoke APIs, connecting retail front ends to back-end and logistics systems.
- **Cloud & Linux ops:** managed critical AWS environments for high-traffic accounts, maintaining availability, scalability, and security.
- **DevOps:** managed version control and deployment, resolving complex merge conflicts and sustaining 100% uptime through major production releases.
- **Delivery at scale:** built and maintained 15+ e-commerce websites - the majority bespoke, plus a full Shopify build - covering architecture through to ongoing performance, security, and feature work.

### Freelance Web Developer

j-interactive (self-employed) | 2003 – 2007

- **Bespoke development:** delivered a range of freelance projects for clients, building database-driven web applications in PHP/MySQL and ASP.

### Senior Website Developer

County Business Net Ltd, Cheltenham | 1999 – 2003

- Network administrator and developer: built the company's database-driven solutions and custom client software (including TCP/IP programming), and managed internal infrastructure and LAN activity.

## Education
